Issue of equity shares made in last one year for consideration other than cash

Our Company has not made any issuances of Equity Shares in the last one year for consideration other than cash.

SECTION II - RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Letter of Offer, including the risks and uncertainties described below and “Financial Statements” on page 83 of this Draft Letter of Offer, before making an investment in the Equity Shares. The risks described below are not the only risks relevant to us or the Equity Shares or the industries in which we currently operate. Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may also impair our business, cash flows, prospects, results of operations and financial condition. In order to obtain a complete understanding about us, investors should read this section in conjunction with “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 66 and 88, respectively, included in this Draft Letter of Offer. If any of the risks described below, or other risks that are not currently known or are currently deemed immaterial actually occur, our business, cash flows, prospects, results of operations and financial condition could be adversely affected, the trading price of the Equity Shares could decline, and investors may lose all or part of the value of their investment. Unless specified in the relevant risk factor below, we are not in a position to quantify the financial implication of any of the risks mentioned below.

However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors. You should consult your tax, financial and legal advisors about the particular consequences to you of an investment in this Issue. The following factors have been considered for determining the materiality: (1) some events may not be material individually but may be found material collectively; (2) some events may have material impact qualitatively instead of quantitatively; and (3) some events may not be material at present but may have material impact in future.

This Draft Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Letter of Offer.

Our financial year ends on March 31 of each year, so all references to a particular Fiscal are to the 12 months ended March 31 of that year. Unless otherwise stated, the financial information used in this section is derived from our Audited Consolidated Financial Statements and Limited Review Unaudited Consolidated Financial Results, which are included in “Financial Statements” on page 83 of this Draft Letter of Offer.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. We generate a significant proportion of our total sales volume from our operations in Madhya Pradesh, Odisha and Karnataka and any adverse developments affecting our operations in these states could adversely affect our business operations and financial performance.***

Our operations in Madhya Pradesh, Odisha and Karnataka contribute a significant share of our total revenue from operations (net of excise duty); i.e. approximately 92%, 75% and 72% of our total domestic revenue from operations (net of excise duty) in the nine months period ended December 31, 2022, Fiscal 2022 and Fiscal 2021, respectively. The other states and agencies which contribute significantly to our revenue are Delhi NCR, Kerala and the Canteen Stores Department. The concentration of our operations and sales in the states of Madhya Pradesh, Odisha and Karnataka increases our exposure to economic, climatic, demographic and other challenges, which may adversely affect our business prospects, financial conditions and results of operations. Any adverse development that affects the economic performance in these states could have a material adverse effect on our operations and financial performance.

- 2. Restriction and prohibition on manufacturing, distribution and sale of alcoholic beverages may affect our operations.***

The manufacturing and distribution of beer is subject to regulation by government of each state of India and is subject to a complex and diverse tax structure. Our Company is subject to the compliance of regulations of each of the states in which it operates its manufacturing facilities, and these regulations may vary from one state to the other. Such regulations include licensing requirements, restrictions on and prescribed labelling of products, marketing set up and restrictions on advertising.

The Directive Principles of the Constitution of India provides that the Government of India should endeavour to implement the prohibition of the manufacture and sale of beer across the country. Currently, the manufacture, sale and consumption of beer is regulated by the Government of each State in India. Prohibition by a State Government in any of the states in which our Company operates would have a significant effect on the results of operations and on its ability to operate its business in such state.

3. Our Company and our Subsidiaries have incurred losses in the recent past and we may incur losses in the future.

Our Company and our Subsidiaries have incurred losses in the recent past, the details of which are provided below:

(₹ in lakhs)		
Name of the Company	March 31, 2022	March 31, 2021
Som Distilleries & Breweries Limited (Consolidated)	(984.00)	(3,807.28)
Som Distilleries & Breweries Limited (Standalone)	(1,097.24)	(1,803.62)
Som Distilleries & Breweries Odisha Private Limited	(273.82)	(1,106.39)
Woodpecker Distilleries & Breweries Private Limited	387.05	(897.29)

There can be no assurance that we will not incur losses in any future periods, or that there will not be an adverse effect on our reputation or business as a result of such losses. Such losses incurred by us may be perceived adversely by external parties such as customers, bankers, and suppliers, which could affect our reputation. For further details, refer to the chapter titled “Financial Information” on page 83 of this Draft Letter of Offer.

4. Our Company has reported negative cash flow in the past. Any negative cash flows in the future would adversely affect our cash flow requirements, which may adversely affect our ability to operate our business and implement our growth plans, thereby affecting our financial condition.

Our Company has experienced negative net cash flow from investing and financing activities in the recent past, the details of which are provided below:

(₹ in lakhs)				
Particulars	March 31, 2022	March 31, 2021	September 30, 2022	September 30, 2021
Net cash generated from Investing Activities	(596.51)	(1,289.33)	(1047.73)	(25.80)
Net Cash Flow from Financing Activities	(929.40)	(1,799.34)	(763.89)	(344.84)

For year ended March 31, 2022, negative cash flow from investing activities is mainly on account of purchase of fixed assets and negative cash flow from financing activities is mainly on account of interest payments.

For six months period ended September 30, 2022 negative cash flow from investing activities is mainly on account of increase in the non-current assets and negative cash flow from financing activities is mainly on account of interest payments as well as repayment of borrowings.

For further details, refer “Consolidated Cash Flow Statement for the year ended March 31, 2022” on page F-20 of the chapter titled Financial Information.

5. Our business is seasonal in nature and it will experience variations in quarterly results of operations which could have an adverse impact on its business.

Our Company’s business is characterized by seasonal fluctuations in demand. Demand for beer, for example, is highest during the months of March to June, which results in peak sales during the last quarter of the fiscal and the first quarter of the subsequent new fiscal, and a build-up of inventory prior to that time. As a result, our Company plans its overall annual production levels based on predicted levels of demand for its products, which it derives from its own market assessments and sales targets from its distributors. Our Company may not be able to accurately predict annual and long-term demand in the future, and any errors in predicting future demand may have a material adverse effect on its business, prospects, results of operations and financial performance.

6. Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These relate to various issues, including food safety, food ingredients, and food packaging requirements, and the investigation and remediation of contamination.

These laws and regulations are becoming increasingly stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we shall ensure compliance with applicable regulatory requirements, it is possible that such compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty.

7. There are certain outstanding legal proceedings against the Company and its Subsidiaries which may adversely affect our business, financial condition and results of operations.

As on the date of this Draft Letter of Offer, our Company is involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, as the case may be, or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

For further details, please see the chapter titled “*Outstanding Litigation and Material Developments*” beginning on page 98 of this Draft Letter of Offer.

8. *Health concerns relating to consumption of alcoholic beverages may reduce the demand for our products.*

There is growing concern among consumers, public health professionals and government agencies about the health problems associated with alcohol consumption. Increasing public concern, additional governmental regulations concerning the marketing, labelling, packaging or sale of alcoholic beverages and negative publicity resulting from actual or threatened legal actions against us or other companies in our industry relating to the marketing, labelling or sale of alcoholic beverages may reduce demand for our beverages, which could adversely affect demand for our products and thereby our profitability.

9. *We are exposed to foreign currency exchange rate fluctuations, which may have an adverse effect on our results of operations and value of the Equity Shares.*

Our exposure to foreign currencies is unhedged due to which we are exposed to foreign currency fluctuation risks. As a result of such exposure, we may incur potential losses if foreign currencies fluctuate significantly. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations.

The exchange rate between the Indian Rupee and the USD and other foreign currencies has changed considerably in recent years and may fluctuate substantially in the future. Fluctuations in the exchange rate between the Indian Rupee and other currencies may affect the value of a non-resident investor's investment in the Equity Shares.

A non-resident investor may not be able to convert Indian Rupee proceeds into USD or any other currency or the rate at which any such conversion may occur could fluctuate. In addition, our market valuation could be seriously harmed by the devaluation of the Rupee, if United States or other non-resident investors analyze our value based on the USD equivalent of our financial condition and results of operations.

For historical exchange rate fluctuations, see “*Certain Conventions, Use of Financial Information and Currency of Presentation*” on page 11 of this Draft Letter of Offer.

10. Our use of imported ingredients and other raw materials and equipment exposes us to the risk of the imposition or increase of tariffs, duties and other levies.

We import some of our ingredients and equipment. Further, some of our third-party suppliers may also import certain ingredients and raw materials. Our Company's or our third parties' imports may increase in the future. India generally imposes import quotas and tariffs which may increase in the future thereby increasing the costs of these commodities and negatively affecting our results.

In addition, Indian authorities may ban imports of certain items into India, as a result of health or other considerations. These and other measures that reduce the supply of imported ingredients or other items in India may cause prices for these items to increase. Consequently, cost of our products would increase. We may not be able to pass this increase in costs to our customers.

11. We have certain contingent liabilities that may adversely affect our financial condition.

As of March 31, 2022, contingent liabilities disclosed in the notes to our Audited Consolidated Financial Statements aggregated ₹ 14,530.96 lakhs. Our contingent liabilities that had not been provided for as on March 31, 2022, are set forth below:

(₹ in lakhs)	
Particulars	Amount
i) Claims against the Group not acknowledged as debts/disputed:	
- Commercial Tax Department	60.71
- Income Tax Department	1,985.58
ii) Guarantees given by Bankers on behalf of the Company not provided for	1,178.67
iii) Corporate guarantee given to a bank on behalf of others	11,306.00

If a significant portion of these liabilities materialize, it could have an adverse effect on our business, financial condition and results of operations.

12. Our failure to protect confidential information like our product recipes, formulations, pricing or launch information could adversely affect our competitive position.

We intend to keep the recipes and formulations of our products confidential. We also keep information in relation to our proposed pricing of any new product, any proposed variation in price or launch of any new product confidential. Any failure to protect such confidential information due to leakage of information may impact our competitive position in our product segment. The appointment letters issued to our employees who use our processes and recipes to manufacture our products, require that all information made known to them be kept strictly confidential. Though there have not been any attempts made till now to divulge our proprietary / trade secrets, the appointment letters may not effectively prevent disclosure of our proprietary information and may not provide any adequate remedy in the event of unauthorised disclosure of such information to our competitors. Consequently, such events may adversely affect our competitive position.

13. Our lenders have charge over our assets in respect of loans that have been availed by us.

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our immovable property. The total amounts outstanding and payable by us as secured loans were ₹11,962.64 lakhs as on January 31, 2023. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our assets may be subject to forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations.

For further details of secured loans of our Company, please refer Note 15 in the chapter titled "Financial Statements" on page F-28 of this Draft Letter of Offer.

14. Our financing agreements contain certain restrictive covenants which may affect our financial and operational flexibility. In the event of breach of any covenants in our financing agreements, our lenders may take any action in connection with such breaches which may have a material adverse effect on our business, results of operation, financial condition and prospects.

Our Company has entered into several borrowing facilities of varying terms and tenures from our lenders. Some of the financing arrangements entered into by us include conditions and covenants that require our Company to obtain consent from such lenders' prior to carrying out certain activities and entering into certain transactions including certain actions and matters in relation to the Issue. Some of these covenants include, altering our capital structure, changing our current ownership / control, formulating a scheme of amalgamation, material change in composition of management, undertaking guarantee obligations, declaration of dividend, and amending constitutional documents, for which we have to obtain consent from lenders. While we had applied to all the relevant lenders for consent to undertake the Issue, consent from some of the lenders is still awaited. Undertaking the Issue without such consents constitutes a breach of covenant under the relevant financing documents, which may lead to our lender requiring us to repay any outstanding loans and may trigger cross-default in our other borrowing arrangements. There can be no assurance that we will obtain relevant consents, on time or at all, and this may restrict/ delay some of the actions / initiatives necessary to operate and grow our business and also impact us financially.

15. *The Novel Coronavirus (Covid-19) pandemic outbreak and steps taken control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.*

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses. Further, there was temporary suspension of imports due to the COVID-19 pandemic. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. Currently, there is substantial medical uncertainty regarding COVID-19 and till any cure is found, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

The extent to which the COVID-19 pandemic, and the related global economic impact, may affect our business, financial condition and results of operations will depend on future developments that are highly uncertain and cannot be predicted, including the spread, scope and duration of the COVID-19 pandemic and any recovery period, the effectiveness of further steps taken by the GoI and the RBI to mitigate the economic impacts in response to the pandemic and its effects.

16. *An inability to manage our growth effectively could adversely affect our business and future financial performance.*

We have experienced significant growth over the last few years as we have expanded our operations across India. However, our ability to grow our business will depend on various factors, many of which are beyond our control. These factors include, but are not limited to customer loyalty to our existing and future products; evolving consumer preferences and our ability to adapt our business and operations; recruiting and training qualified personnel; further strengthening our flagship products in new markets; competition in our markets; availability of financing at suitable terms and conditions; and sourcing and managing the cost of our expansion and identifying suitable supply and delivery resources.

In order to effectively manage our growth, we will need to further strengthen our operating systems, procedures and internal controls systems, and a failure to do so on a timely basis, or any weakness in our internal controls, may result in inconsistent or flawed operating procedures. The development of future business may also be affected by external factors, including general political and economic conditions in India and our international markets, government policies or strategies, particularly with respect to excise duty and sales tax applicable to our products and operations, as well as prevailing interest rates and currency exchange rates. Moreover, our ability to sustain our growth depends on our ability to attract and retain key management personnel, maintain effective risk management policies and address adverse market or business developments.

If we are unable to achieve our business strategy of organic and inorganic growth and if our existing and future management resources, operational and financial systems, and operating procedures and control measures are not adequate to support the growth in our future operations, it may adversely affect our business prospects and future financial performance.

17. *If we are unable to raise additional capital, our business prospects could be adversely affected.*

We intend to fund our growth and expansion plans through our cash on hand and cash flow from operations. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure and production capacity. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our cash on hand and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, if we are unable to arrange adequate financing on timely basis, it could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and regulatory framework that allows us to raise capital. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

18. *Consumer's taste and preference may change and they may not prefer our products in the future which may adversely affect demand for our products. Further, an inability to maintain our competitive position in India and in our other markets, and failure to adapt our product offerings to changing market trends and consumer tastes, preferences and spending habits could cause our sales to decline and may adversely affect our business, prospects and future financial performance.*

We operate in the highly competitive alcoholic beverages and IMFL products segments and rely on the continued demand for our beverages in India. We compete with global, regional and local brands of alcoholic beverages. If the number of competitors or level of marketing or investments undertaken by such competitors were to increase, it may result in a reduction in the consumption of our products and may reduce our market share, or we may be required to incur increased marketing and distribution related expenses in order to remain competitive. In addition, the success of our business depends on consumer behaviour and preferences and their affinity and loyalty to our beverages and brands, and there can be no assurance of market acceptance and consumer preference for new beverages or that there will be an increase in market share of the products. Our future growth and success will depend significantly on our ability to anticipate changes in market trends and consumer tastes and preferences, and then to identify, source and bring to the market in a timely manner wine products that satisfy the preferences of a broad range of consumers. In the event of a significant change in consumer preferences or in the event of an inability on our part to anticipate or react to such changes, it could result in reduced demand for our beverages and erosion of our competitive position and goodwill and could adversely affect our business, prospects, results of operations and financial condition.

In addition, we compete with aggressive marketing and promotional activities by other global, regional or local alcoholic beverage producers on price and promotional discounts announced from time to time. Other global and regional beverage producers in our markets typically match the pricing of our products. However, if the competition alters their pricing model, and we are unable to change our product prices in response to such competitive measures, our results of operations and profitability may be materially and adversely affected.

19. *Information relating to the manufacturing capacities of our production facilities included in this Draft Letter of Offer are based on various assumptions and estimates. Underutilization of capacity of our manufacturing facilities may adversely affect our business, results of operations and financial condition.*

The information relating to the utilisation capacities of our manufacturing facilities included in this Draft Letter of Offer are based on various assumptions and estimates of our management, including proposed operations, assumptions relating to availability and quality of raw materials and assumptions relating to potential facility capacity, facility operating shifts, and potential operational efficiencies. Capacity additions to our production facilities have been made on an incremental basis, including through expansion of our production facilities, improving material handling and other operational efficiencies in the production process and addition of equipment or production lines from time to time. Actual production levels and future capacity utilization rates may vary significantly from the estimated manufacturing capacities of our manufacturing facilities and historical capacity utilization rates. In addition, capacity

utilization is calculated differently in different countries, industries and for the different kinds of products we manufacture.

In relation to our manufacturing capacity, assumptions have been made in the calculation of the estimated annual installed capacities of our production facilities included in this Draft Letter of Offer. Undue reliance should therefore not be placed on the manufacturing capacity information for our existing manufacturing facilities and any additional capacity information proposed or the historical capacity utilization rate information included in this Draft Letter of Offer.

20. *Any significant interruption in production at our facilities or any break-down of our machinery could have a material adverse effect on our business, results of operations and financial condition.*

Our manufacturing facilities are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, directives from government agencies, water shortages and power interruptions. All of the production facilities require a significant amount and continuous supply of electricity and water and any shortage or non-availability of electricity and water may adversely affect our operations. The production process of our products, as well as the storage of certain raw materials and finished product at particular temperatures requires uninterrupted electricity. We currently use ground water at our Bhopal plant and for the plant at Hassan, the water is sourced from the local municipality, while we also have a backup water source in the form of tubewells. Similarly for the Odisha plant, we depend on the ground water as well as the water supply from the municipality. We also depend on state electricity supply for our energy requirements. Although we have diesel generators to meet exigencies at our facilities, our operations at our facilities may be adversely affected during power failures. Any failure on our part to obtain alternate sources of electricity or water, in a timely fashion, and at an acceptable cost, may have an adverse effect on our business, results of operations and financial condition.

Further, our manufacturing facility is heavily dependent on our plant and machinery. Any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. If we are unable to procure the necessary spare parts in a timely manner in case of breakdown of machinery or if we are unable to carry out the necessary repair of the malfunctioning machinery promptly, our manufacturing operations may be hampered which could have an adverse impact on our results of operations and financial condition.

21. *We do not own the warehouse which is currently used by us. There can be no assurances that the lease agreement will be renewed upon termination or that we will be able to obtain other premises on lease on same or similar commercial terms. Further, we make significant capital improvements to our leased premises, the cost of which we may be unable to recover.*

Our warehouse is located on leased premises. The lease agreements may be terminated in accordance with their respective terms, and any termination or non-renewal of such leases could adversely affect our operations. There can be no assurance that we will be able to retain or renew such leases on same or similar terms, or that we will find alternate locations for the existing warehouse on terms favourable to us, or at all. Failure to identify suitable premises for relocation of existing property, if required, or in relation to new or proposed properties we may purchase, in time or at all, may have an adverse effect on our production and supply chain, the pace of our projected growth as well as our business and results of operations.

We periodically make significant, fixed capital improvements to our facilities. We may also invest in additional power supply infrastructure at our locations or other significant, fixed capital improvements, but any such investments generally become the property of the landlord after the expiration of the lease/ license. The cost of such capital improvements has gone up in recent times. As such, we may be unable to recover investments we make in upgrading our locations at the termination of a lease/ license, such as investments in power supply infrastructure.

22. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

We are adequately insured against all losses and risks involving property and third party liability. For our operations, we have obtained insurance cover for standard fire and special perils, cash in transit, group personal accidental companies. Notwithstanding the insurance coverage that we carry, we may not be fully insured against some business risks and the occurrence of an event that causes losses in excess of limits

specified under the relevant policy, or losses arising from events not covered by insurance policies, could adversely affect our business, results of operations and financial condition. If we are subject to litigation or claims or our operations are interrupted for a sustained period, the insurance policies may not be found to be adequate to cover the losses that may be incurred as a result of such interruption. If we suffer large uninsured losses or if any insured losses suffered by us significantly exceed our insurance coverage or our insurance claim is rejected, it may adversely affect our business, results of operations and financial condition.

23. *Activities involving our manufacturing process can be dangerous and can cause injury to people or property in certain circumstances. A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, sales and ability to meet customer demand.*

Our business operations are subject to hazards such as risk of equipment failure, work accidents, fire or explosion and require individuals to work under potentially dangerous circumstances or with flammable materials. Although we employ safety procedures in the operation of our facilities and maintain what we believe to be adequate insurance, there is a risk that an accident or death may occur in one of our facilities. An accident may result in destruction of property or equipment, environmental damage, manufacturing or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. Any such accident may result in litigation, the outcome of which is difficult to assess or quantify, and the cost to defend litigation can be significant. As a result, the costs to defend any action or the potential liability resulting from any such accident or death or arising out of any other litigation, and any negative publicity associated therewith, may have a negative impact on our business, financial condition, results of operations, cash flows and prospects.

In particular, if operations at our manufacturing facility were to be disrupted as a result of any significant workplace accident, equipment failure, natural disaster, power outage, fire, explosion, terrorism, adverse weather conditions, labour dispute, obsolescence or other reasons, our financial performance may be adversely affected as a result of our inability to meet customer demand or committed delivery schedules for our products. Interruptions in production may also increase our costs and reduce our sales, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations, cash flows and prospects.

24. *We appoint contract labour for carrying out certain of our operations and we may be held responsible for paying the wages of such workers, if the independent contractors through whom such workers are hired default on their obligations, and such obligations could have an adverse effect on our results of operations and financial condition.*

In order to maintain operational efficiencies, we appoint independent contractors who in turn engage on-site contract labour for performance of certain of our operations. We determine the number of contract labourers required depending on the requirement of our business from time to time. Although we do not engage these labourers directly, in the event of default by any independent contractor, we may be held responsible for any wage payments that must be made to such labourers. If we are required to pay the wages of the contracted employees, our results of operations and financial condition could be adversely affected. In addition, under the Contract Labour (Regulation and Abolition) Act, 1970, we need to update the licenses obtained by us regularly and failure to do so can attract penalties under the said Act. As on date of this Draft Letter of Offer, certain agreements with the labour contractors have been expired and the same are in process of renewal. Delay in renewals, if any, of such agreements or licenses could lead to penalties under the Contract Labour (Regulation and Abolition) Act, 1970 and rules made thereunder.

25. *Interruptions in the transportation of raw materials or delivery of finished products, and poor handling of materials or products in transit could interrupt our business, cause us losses, damage our reputation, and adversely affect our results of operations and financial condition.*

We take delivery of many of our raw materials requirements at respective production facilities and typically the transportation and delivery of raw materials are undertaken by third party contractors. We may also face disruptions in the delivery of our products for various reasons beyond our control, including poor handling by distributors of our products, transportation bottlenecks, natural disasters and labour issues, breakdown of equipment, accidents, fire, loss of water or power supply, terrorism, political instability, military conflict, pandemic, strikes, the financial and/or operational instability of key suppliers,

distributors, warehouses and transportation providers or brokers, or other reasons, which could impair our ability to sell our products, and lead to delayed or lost deliveries. Any supply disruptions could exert pressure on our costs, and we cannot assure you that all or part of any increase costs can be passed along to our consumers in a timely manner or at all, which could negatively affect our business, results of operations, future cash flows and financial condition. There has been substantial increase in prices of various raw materials and logistics costs due to current inflationary trends. However, there is no assurance that we may not experience significant increases in the prices of our raw materials in the future. To the extent that we are unable to effectively manage such events if they occur, or cannot financially mitigate the likelihood or potential impact of such events, there could be a material adverse effect on our business and results of operations.

26. *Our Company may incur penalties or liabilities for non-compliances with certain provisions of the SEBI (LODR) Regulations, Companies Act and any other applicable laws in prior years.*

The Equity Shares of our Company are listed on BSE and NSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations. There have been instances in the past wherein, our Company has failed to comply with the requirements of the SEBI Listing Regulations in a timely manner. For further details, refer chapter titled “*Outstanding Litigation and Material Developments*” on page 98 of this Draft Letter of Offer.

Although, our Company endeavours to comply with all such obligations/reporting requirements, there may be non-disclosures/delayed/erroneous disclosures and/or any other violations that might be committed by us, and the same may result into Stock Exchanges and/or SEBI imposing penalties, issuing warnings and show cause notices against us and/or taking actions as provided under the SEBI Act and Rules and Regulations made there under and applicable SEBI Circulars. Any such adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

27. *Certain Promoters, Promoter Group and Directors hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

As on December 31, 2022, our Promoters and Promoter Group hold 32.72% of the Equity Share Capital and are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. Our Promoters may exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may not be able to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders.

Further, as on December 31, 2022, our Promoter Director, Mr. Jagdish Kumar Arora holds 1,33,38,809 equity shares, Mr. Nakul Sethi, Executive Director holds 47,857 equity shares and Mr. Satpal Kumar Arora, Independent Director holds 16,225 equity shares which together constitutes 18.17% of the total shareholding of the Company, and are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company.

For further details, see “*Capital Structure*” and “*Financial Information*” on pages 43 and 83, respectively, of this Draft Letter of Offer.

28. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have in the past entered into transactions with some of our Promoters, relatives of our Promoters, Directors, and enterprises over which our Directors have a significant influence. While all such transactions have been conducted on an arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, financial condition,

and cash flows. In the event any conflict of interest arises between us, or to the extent that competing products offered by any of our related parties erode our market share, we may not be able to effectively manage any such conflict or competitive pressures and, consequently, our business, results of operation and financial condition may be adversely affected. For further information on related party transaction, see Note 32 on page F-34 in the chapter titled “Financial Information”.

- 29. *Our Company has obtained, unsecured loans from the Promoters which may be recalled at any time. Any recall of the unsecured loans obtained by our Company may have an adverse effect on our business, prospects, financial condition and results of operations.***

Our Company has obtained unsecured loans, some or all of which may be recalled on demand. As on January 31, 2023, our Company has outstanding unsecured loans of ₹5,303.78 lakhs of which ₹1,765.30 lakhs have been availed from the promoters and members of the promoter group. If the unsecured loans obtained by our Company are recalled at any time, the financial condition of our Company may be adversely affected.

- 30. *An interruption in the supply or significant increase in the price of raw materials or packaging materials may adversely affect our business, prospects, results of operations and financial condition.***

Our inability to maintain efficient inventory management and stock of raw materials at optimum levels may affect our operations. The availability and price of raw materials as well as the availability and price of packaging materials in particular of aluminium, glass, plastic closures, crowns and labels, may also impact our operations. The price of such raw materials and packaging materials may be affected by changes in global supply and demand, weather conditions, governmental policies, exchange rates and other macroeconomic factors. A prolonged interruption in the supply of raw materials or packaging materials may require us to identify alternative suppliers, which may require us to pay significantly higher prices for such raw materials and packaging materials. In the event of a significant increase in the price of such raw materials and packaging materials, it will increase our cost of production and other operating costs and decrease our profitability in the event we are unable to pass on such price increases to the dealers, and ultimately the consumers, by increasing the price of our beverages.

Our largest consumption of raw materials and packing material is of glass bottles. Our expenditure relating to purchase of bottles which represented 36.45%, 48.31% and 50.84% of our cost of materials consumed in Fiscal 2021 and 2022, and for the nine months period ended December 31, 2022, respectively. We also purchase packaging materials such as CC boxes, labels from various local / regional suppliers. We typically do not enter into long term supply contracts with any of the raw material and packaging material suppliers, but typically place orders in advance of our anticipated requirements at agreed prices. In the absence of long term supply contracts, we are susceptible to a sudden and significant increase in prices of raw materials and packaging materials. In addition, we are susceptible to the risk that one or more of our existing raw material or packaging materials suppliers may discontinue supplies to us, and unless we are able to enter into alternative arrangements in a timely manner on terms favourable to us, our business operations and financial performance may be materially and adversely affected. Certain of our critical raw materials such as malt, barley, rice and sugar may also be subject to seasonal fluctuations in price.

- 31. *Any real or perceived contamination or deterioration of our beverages could result in reduced sales legal liability, damage our reputation and adversely affect our business prospects and financial performance.***

The actual or alleged contamination or deterioration of our beverages could result in legal liability, damage our reputation and adversely affect our business prospects and consequently our financial performance. We are subject to various regulations relating to legal liability, including in particular relating to safety of our products. We sell products for human consumption, which involves risks such as product contamination or spoilage, product tampering and other adulteration of our products. Although we conduct various tests before procurement of our raw materials, there can be no assurance that such testing and verification on quality of the raw material checks conducted by us will be accurate at all times. The risk of contamination or deterioration exists at each stage of the production cycle, including during the production and delivery of raw materials, the bottling, storage and delivery to our customers and the storage and shelving of our products by distributors and customers until final consumption by consumers. We follow stringent quality control processes and quality standards but there can be no assurance that our products will not be contaminated or suffer deterioration. If any of our products are found to have been contaminated or to have

deteriorated, we could be required to recall large quantities of our beverages, and we could incur criminal or civil liability for any adverse medical condition or other damage resulting from consumption of such products.

Furthermore, the mere allegations that our products contain or has contained any contaminants could damage our reputation and have a material adverse effect on our business, regardless of whether these reports have any factual basis, especially in the current scenario where social media posts/blogs/tweets can be posted without any fact-checking.

Although we have not experienced any significant product liability claims in the past, there can be no assurance that our customers, or unrelated third parties, will not bring claims against us in the future that may result in adverse publicity. In case of any such product liability claims, there can also be no assurance that any product liability insurance will be sufficient to indemnify us against such liabilities. Any such product liability claim or contamination incident may adversely affect business prospects, results of operations and financial condition.

32. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.*

Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements.

Although we declared an interim dividend for FY 2022-23 at the rate of 5% i.e. ₹ 0.25 per share on equity shares having face value of ₹ 5 per share, the Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

33. *Our inability to expand or effectively manage our sales force, retailers and coverage of the width of distribution for our products or any disruptions in our supply or distribution infrastructure may have an adverse effect on our business, results of operations and financial condition.*

Our sales are dependent upon the growth of our brands and increased market coverage which shall be done by covering more of the retailer points through our sales force. We are dependent upon our sales force for the coverage of the width of distribution of our products across the different states. The width of distribution is important as there are specific points of sale of our products and they are a defined universe.

We are also dependent upon the various state governmental agencies for stocking our products at their designated warehouses. Our ability to influence retailers also depends upon timely settlement of schemes and other market incentives. Any delay in the scheme settlement shall result in lower stocking of our products at the point of sale.

We are dependent upon the supply of new bottles for beer from domestic as well as international suppliers. Any adverse event or development can lead to an irregular supply of our finished products in our key markets.

34. *We are dependent on third-party suppliers in respect of availability of our raw materials. Any interruption in the supply of such raw material and its price volatility could adversely affect our business, results of operations and financial condition.*

Our principal raw materials for making the alcoholic beverages are malted barley, rice flakes, sugar and hops. Further we use the packing materials used by us are our proprietary glass bottles and CC boxes.

Raw materials are subject to supply disruptions and price volatility caused by various factors, including commodity market fluctuations, the quality and availability of supply, currency fluctuations, consumer

demand and changes in government policies. In addition, while competition for procuring raw material may result in an increase in raw material prices, our ability to pass on such increases in overall operational costs may be limited. Furthermore, any increase in the cost of raw materials which results in an increase in prices of our products, may reduce demand for our products and thereby affect our margins and profitability. Supply interruptions or delays may lead to delays in production and higher raw material costs. The cost of materials consumed was 62.81%, 58.80% and 57.09% of our total revenue from operations (net of excise duty) for the nine months period ended December 31, 2022, Fiscal 2022, Fiscal 2021 and respectively. Generally, we do not execute agreements with any of the suppliers for long-term supplies of raw materials. Although we procure our raw materials from several suppliers to ensure consistent availability, there can be no assurance that we will be able to do so in the future. We are exposed to the risk of delay in supplies of raw materials as well as price escalations and supplier defaults. We also face political risk in case of diplomatic dispute and break down of trade channel with the countries from where we import our raw material.

If our suppliers are unable to supply us with adequate quantities of raw materials at commercially reasonable prices, or if we are unable to procure raw materials from other sources on commercially acceptable term, our business and results of operations could be adversely affected. In certain circumstances, our suppliers may choose to supply the raw materials to our competitors instead of us. Any increase in raw material prices will result in corresponding increases in our raw material costs. In addition, because of the time lag between purchase of the raw material and the sale of the Company's end-products, the Company is often unable to pass through any increase in costs to its customers.

All of these factors could have a material adverse effect on the Company's business, prospects, results of operations and financial condition.

35. *Any loss of business or potential adverse publicity resulting from spurious or imitation beverages, may lead to loss of sales and adversely affect our business, prospects, results of operations and financial condition.*

We are exposed to the risk that entities in India and elsewhere could pass off their products as our products, including spurious or imitation products, inspite of our Company having registered its brands/trademarks. For example, cloned products or products imitating our brands and packaging material selling spurious beverages may adversely affect sale of our products, resulting in a decrease in market share resulting from a decrease in demand for our products. Such imitation or spurious products may not only result in loss of sales but also adversely affect the reputation of our Company and the beverages we produce and sell and consequently our future sales and results of operations. The proliferation of spurious, cloned and imitation beverages and the time and resources in taking action against such spurious products, defending claims and complaints regarding such non-genuine products, could result in lower sales, and adversely affect our results of operations and may have material and adverse effect on our reputation, business, prospects, results of operations and financial condition.

36. *Any inability to protect our intellectual property or any claims that we infringe on the intellectual property rights of others could have a material adverse effect on us.*

As on December 31, 2022, we have 52 trademarks, including our key brands Hunter, Black Fort and Power Cool. Presently 8 trademarks are objected, and rectification has been filed for 2 trademarks. We have also applied for registration of other trademarks, which remain pending at various stages of the registration process. Further certain trademarks are registered under the name of Som Distilleries Limited and Som Distilleries Private Limited. Till date there has been no conflict with respect to the proprietorship of such trademarks but in event of any such conflict, we may have to pay a certain amount to the proprietors for usage of such trademarks. We may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted.

We are also exposed to the risk that other entities may pass off their products as ours by imitating our brand name, packaging material and attempting to create counterfeit products. There may be other companies or vendors which operate in the unorganized segment using our trade name or brand names. Any such activities could harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance and the market price of the Equity Shares. The measures we take to protect our intellectual property include relying on Indian laws and initiating legal proceedings, which may not be adequate to prevent unauthorized use of our intellectual property by third parties.

Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our reputation, business, financial condition, cash flows and results of operations.

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights which may force us to alter our brand names. We may also be susceptible to claims from third parties asserting infringement and other related claims. If similar claims are raised in the future, these claims could result in costly litigation, divert management's attention and resources, subject us to significant liabilities and require us to enter into potentially expensive royalty or licensing agreements or to cease usage of certain brand names. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. Any of the foregoing could have an adverse effect on our reputation, business, financial condition, cash flows and results of operations.

37. *We are dependent on a number of key personnel, including our senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

We are highly dependent on our directors, senior management and other key personnel for setting our strategic business direction and managing our business. We currently do not have any non-compete agreements with our directors, senior management or other key personnel and have not obtained any key man insurance with respect to such individuals. Our ability to meet continued success and future business challenges depends on our ability to attract, recruit and retain experienced, talented and skilled professionals. Due to the current limited pool of skilled personnel, competition for senior management, commercial and finance professionals in our industry is intense.

In the event of the loss of services of our directors, senior management or other key personnel or our inability to recruit or train a sufficient number of experienced personnel or our inability to manage the attrition levels in different employee categories may have an adverse effect on the Company's financial results and business prospects.

38. *Any downgrading of our credit rating by a domestic or international credit rating agency may increase interest rates for our future borrowings, which would increase our cost of borrowings, and adversely affect our ability to borrow on a competitive basis.*

Our Company's debt borrowings which was BBB- (Stable) / A3 as on April 7, 2022, has improved to BBB (Stable) / A3+ as on August 4, 2022 by ICRA vide their rating rationale dated August 4, 2022. Our credit rating reflects, amongst other things, the rating agency's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Our inability to obtain such credit rating in a timely manner or any non-availability of credit ratings, or poor ratings may increase borrowing costs and constrain our access to capital and lending markets and, as a result, could adversely affect our business and results of operations. In addition, non-availability of credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements.

Any future downgrade of our credit ratings may increase interest rates of for refinancing our borrowings, which would increase our cost of borrowings, and may have an adverse effect on our future issuances of debt and our ability to borrow on a competitive basis. Further, any downgrade in our credit ratings may also trigger an event of default or acceleration of repayment of certain of our borrowings. If any of these risks materialise, it could have a material adverse effect on our business, results of operations and financial condition.

39. *Our Company has applied for change in name and awaits the approval from RoC and the Stock Exchanges.*

Our Company passed a resolution to change the name of the Company from "Som Distilleries and Breweries Limited" to "Som Distilleries Breweries and Wineries Limited" for better representation in the market, at its board meeting held on November 18, 2022. The same was approved by the Shareholders at

their meeting held on December 27, 2022. Our Company has made necessary filings and intimations with the RoC and the Stock Exchanges but still awaits their approval for the change in name. The RoC or Stock Exchange may reject our application or intimate defects in the application, due to which we may have to refile the application.

40. *We are subject to extensive licensing regime with changing laws, rules and regulations and our inability to obtain, maintain or renew requisite statutory and regulatory permits and approvals for our business operations could materially and adversely affect our business, prospects, results of operations and financial condition.*

The alcoholic beverages segment is subject to extensive government regulation and in respect of our existing operations we are required to obtain and maintain various statutory and regulatory permits, certificates and approvals including approvals under the Food Safety and Standards Act, 2006, Water (Prevention and Control of Pollution) Act, 1974, environmental approvals, factories licenses, labour related and tax related approvals. Unfavourable changes in such laws or policies or the promulgation of new laws, rule and regulations applicable to our industry, could adversely affect our business and financial performance. There can be no assurance that the relevant authorities will issue or renew any expired permits or approvals in time or at all. Failure or delay in obtaining approvals or failure by us to obtain, maintain or renew the required permits or approvals within applicable time, may result in interruption of our operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

Although we endeavour to obtain and maintain relevant regulatory approvals applicable to our operations, such approvals are subject to various conditions and in the event of an inability to comply with such conditions, the relevant regulatory authorities may suspend or revoke such approvals. In addition, the regulations governing our operations may be amended and impose more onerous obligations on us which may result in increased costs, be subject to penalties, or suffer disruption in our activities, any of which could adversely affect our business.

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. In spite of having being in compliance with applicable food safety, and other applicable laws and regulations, we may be subject to additional regulatory requirements due to changes in governmental policies. Further we may also incur additional costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These relate to various issues, including food safety, food ingredients, and food packaging requirements, and the investigation and remediation of contamination.

These laws and regulations governing the food and beverage industry are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty.

We engage various contractors at our processing plants. We cannot assure you that the contractors operating our processing plants will be able to obtain and maintain relevant approvals for continuous operations of such facilities. Failure of the contractors to maintain requisite government approvals may lead to a disruption at our production facilities and consequently in the production and supply of our products and may adversely affect our results of operations. Certain material consents, licenses, registrations, permissions and approvals that are required to be obtained by our Company for undertaking its business have elapsed in their normal course and our Company has either made an application to the relevant Central or State government authorities for renewal of such licenses, consents, registrations, permissions and approvals or is in the process of making such applications.

- 41. *Some of our agreements in relation to our property are under stamped or inadequately stamped and if any financial or judicial implication arises out of the same it may have an effect on the Company's financial position and reputation.***

Some of agreements in relation to our property are under stamped. An inadequately stamped or unregistered document is inadmissible as evidence before any judicial forum. It may be further noted that such inadequately stamped document is capable of being impounded upon presentation before any governmental or judicial authority and an applicable penalty may be imposed as per the applicable laws. If any financial or judicial implication arises out of the same it may have an effect on our Company's financial position and reputation.

- 42. *Failure to comply with environmental laws and regulations could lead to unforeseen environmental litigation which could impact our business and our future net earnings.***

We are subject to various international, national, state, municipal and local laws and regulations concerning environmental protection in India, including laws addressing the discharge of pollutants into the air and water, the management and disposal of any hazardous substances, and wastes and the clean-up of contaminated sites. Environmental laws and regulations and their enforcement in India and our international licensed territories are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be pre-empted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment and emissions management. Further, any violation of the environmental laws and regulations may result in fines, criminal sanctions, and revocation of operating permits or shutdown of our facilities.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated and may adversely affect our business, results of operations or financial condition. In the event our products are found to be non-compliant, our products could be restricted from entering certain markets, and we could face other sanctions, if we were to violate or become liable under environmental laws. In the event we are found to be non-compliant, the potential exposure could include fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs. Further, liability under some environmental laws relating to contamination of sites can be imposed retroactively. The amount and timing of costs under environmental laws are difficult to predict.

- 43. *We have commissioned an industry report for the disclosures made in the chapter titled "Industry Overview" and made disclosures on the basis of the data provided in the same and such data has not been independently verified by us.***

We have commissioned a thematic report titled "*Indian Alcohol Beverage Industry*" issued by ICRA Limited for the disclosures which need to be made in the chapter titled "*Industry Overview*" on page 55 of this Draft Letter of Offer. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

ISSUE SPECIFIC RISKS

- 44. *We will not distribute the Letter of Offer, the Abridged Letter of Offer, Application Form and Rights Entitlement Letter to overseas Shareholders who have not provided an address in India for service of documents.***

In accordance with the SEBI ICDR Regulations and SEBI Rights Issue Circulars our Company will send, only through email, the Letter of Offer, the Abridged Letter of Offer, the Rights Entitlement Letter, Application Form and other issue material to the email addresses of all the Eligible Equity Shareholders who have provided their Indian addresses to our Company or who are located in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Issue Materials will not be distributed to addresses outside India on

account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

45. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated SEBI circular bearing reference number SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020 read with SEBI circular bearing reference number SEBI/HO/CFD/SSEP/CIR/P/2022/66 dated May 19, 2022, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 115 of this Draft Letter of Offer. In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circulars, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only.

46. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 115 of this Draft Letter of Offer.

47. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

48. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12

months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

- 49. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

- 50. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.***

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

- 51. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISK FACTORS

- 52. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.***

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

53. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

54. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. There can be no assurance that the government may not implement new regulations and policies which will require us to obtain approvals and licenses from the government and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations or cash flows. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

55. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in

the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

56. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

57. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

58. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favorable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

59. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

Basis of Estimation - Holding Period

Sr. No.	Particulars	Basis	Audited for the Fiscal 2022	Estimated for the Fiscal 2023	Projected for the Fiscal 2024
1	Trade Receivables	Days	88	45	45
2	Inventories				
	i. Raw Material	Days	45	30	30
	ii. Work-in-Progress	Days	10	20	20
	iii. Finished Goods	Days	44	30	30
3	Trade Payables	Days	31	60	60

Justification for holding period levels

Inventories	Raw Materials: The average raw material inventory holding level in FY 2022 was 45 days, which is expected to be at 30 days for FY 2023 and FY 2024, respectively. We believe that considering the overall economic conditions and the expected sales, one month inventory period shall be required to ensure uninterrupted production.
	Work in progress: The average Work in Progress for FY 2022 have been 10 days. Our Company expects that work in process would increase to around 20 days in FY 2023 and FY 2024, respectively, as a result higher production. Greater production planning coupled with visibility in sales shall help our Company to achieve this and improve further.
	Finished Goods: The average Finished Goods holding period for FY 2022 have been 44 days (approximately one and half month's stock). However, going forward we feel that we can reduce the holding of finished goods by achieving higher inventory turnover. Our Company expects that finished goods holding level would reduce to around 30 days in FY 2023 and FY 2024. Any unexpected demand shall be met through the same and at the same time not be short of stocks. The one month's closing stock shall also result in cost competitiveness and also effective working capital utilisation.
Debtors	The debtors' realization for FY 2022 was around 88 days. Based on our long standing relations with many of our customers, a better collection period of 45 days for FY 2023 and FY 2024 seems realistic and achievable, given the current macro environment.
Creditors	On the same lines, during FY 2022, our creditors period was around 31 days (approximately one month). However, for FY 2023 and FY 2024, we expect the creditors payment period to be 60 days (approximately two months).

Highlights

Covid-19 had a severe impact on the beer industry and a moderate impact on the IMFL industry; severity of the impact was mainly driven by the timing of Covid waves, which occurred during summer, the peak season for beer.

With the waning impact of the pandemic, the alcobev industry witnessed a healthy revival in FY2022 and is poised to report 18-20% growth in revenues in FY2023. However, OPM is likely to moderate by 100-150 bps in FY2023 due to the rise in key input costs such as ENA, barley, and glass, partly offset by revival in demand over the last few quarters.

The alcobev industry was impacted over FY2021 and FY2022 owing to the impact on the on-trade channel due to the pandemic. While IMFL players witnessed a moderate impact, beer players reeled under loss of volumes as their peak summer season coincided with the first and the second waves of Covid.

With the waning impact of the pandemic, ICRA's sample set reported 40% YoY growth in revenues in H1 FY2023 led by the revival in demand and premiumisation coupled with a low base. ICRA's sample set is poised to report strong growth of 18-20% in FY2023 backed by healthy volumes and product mix benefits, despite divestment of some brands by one of the companies in the sample set. Growth of beer players is expected to be higher than that of IMFL players following a normal peak season during Q1 FY2023. ICRA's sample set is likely to report moderate growth of 5-10% in revenues in FY2024 due to the high base of FY2023.

After being subdued in FY2021 affected by the pandemic, Extra Neutral Alcohol (ENA) prices started witnessing a sharp rise from Q3 FY2022 owing to incremental demand from the petrochemical sector following the announcement of the ethanol blending policy. Prices of barley, key input for beer, have also increased significantly from March 2022 onwards due to the Russia-Ukraine conflict. Ability of industry players to get price increase from state governments in a timely manner, given the continuous increase in RM prices remains critical from the profitability perspective.

OPM for ICRA's sample set contracted by 180 bps to 12.6% in FY2021 due to the pandemic. However, the same revived to 14.4% in FY2022 led by increased realisation and economies of scale following recovery in demand. While the OPM is expected to remain healthy, it is likely to moderate by 100-150 bps in FY2023 due to relatively higher input prices over the last few quarters.

While the sample set undertook modest capex at 2-5% of operating income till FY2022, the same is expected to increase to 8-9% in FY2023 largely on account of greenfield expansions and enhancement in backward integration capabilities by some players. The same is being partly funded through debt. However, ICRA expects the industry to continue to demonstrate stable credit metrics supported by healthy demand.

ICRA sample set includes Associated Alcohols & Breweries Limited, GM Breweries Limited, Mohan Meakin Limited, Radico Khaitan Limited, Som Distilleries & Breweries Limited, Tilaknagar Industries Limited, United Breweries Limited, and United Spirits Limited.

Outlook for FY2023 and FY2024

India 3rd largest alcobev market globally

- The Indian alcobev market is the third largest market globally in terms of value and is one of the fastest growing markets. The manufacturing ecosystem includes brand owners, contract manufacturers including distillers, breweries and bottlers.
- Under the IMFL segment, whisky is the major contributing segment in terms of both volume and value.
- Based on pricing, the alcobev industry is classified into various segments such as Popular, Prestige, Premium and Luxury.

Source: ICRA Research; Strong beer has more than 5% alcohol content and mild beer has less than 5% alcohol content

Southern states are key contributors to the domestic consumption of alcohol

Source: ICRA Research

In India, IMFL and beer constitute majority (85-90%) of the alcobev industry in terms of value.

While IMFL consumption is tilted towards southern states, beer consumption is higher in the northern and central states. Conducive weather conditions in southern states support steady IMFL consumption. Long and hot summers in the northern and central states support high consumption of beer in these regions.

The southern states comprising Kerala, Telangana, Karnataka, Tamil Nadu, and Andhra Pradesh account for 40-50% of the total alcohol consumption. Other high consumption states include West Bengal, Odisha, Delhi, Haryana, and Punjab.

Despite being the third-largest market globally, per capita consumption of alcohol in India is one of the lowest at 5-6 ltrs. p.a., compared to 7-10 ltrs. p.a. in countries such as China, US, East Asia and the Pacific.

Highly regulated industry with state-specific pricing policies

Dynamic regulatory landscape across states

State	Regulatory changes	Impact
Delhi 	From July 30, 2022, Delhi rolled back its old excise policy and the government agencies have entirely taken control of the supply of alcohol. In the previous excise policy, which was implemented from November 2021 till July 2022, private operators were allowed to run the liquor shops, without any government intervention.	The alcohol players are experiencing decline in their revenues, due to this change in policy. Further, no discounts are being allowed in this policy, thereby reducing the supplies in the market.
Madhya Pradesh 	Slashed 10% of excise duty and 10% reduction in maximum retail price (MRP), increased selling points from 900 to 2,900 retail shops, with effect from April 1, 2022.	This supported volume growth of alcohol players, by virtue of decline in excise duty, MRP and increase in selling points.
Maharashtra 	Slashed 50% excise duty on imported scotch whisky from November 2021 onwards.	This has led to increased competition in the domestic market in the premium category.
West Bengal 	Prices of some premium and semi-premium whisky brands were slashed by 30% and beer price reduced by 5-6% from November 2021 onwards.	Increased volumes witnessed in premium brands, thereby supporting the revenue growth of alcohol players.
Andhra Pradesh 	Changed route-to-market by setting up state-managed retail outlets and discontinuing private retailers from July 2019 Slashed IMFL prices by 15-20% from December 2021 onwards	Impacted the alcohol companies on account of drastic reduction in their sale volumes. This led to increase in sales volumes, thereby supporting the players' revenue growth. The move was mainly to curb consumption of illicit country liquor.

Sept-Dec is peak season for IMFL sales led by festive period and winter season

Exhibit: Quarterly revenues for IMFL players in ICRA sample set

- Q3 of every fiscal is the peak season for IMFL consumption, contributing ~30% to the full-year sales, driven by spike in demand during winters in North and Central India, festive season, and auspicious dates for weddings and ceremonies.
- Revival in demand and improving premiumisation coupled with low base of FY2021 supported ~22% YoY growth in revenues in FY2022 for ICRA's sample set. Further, H1 FY2023 witnessed YoY growth of 28%, backed by revival in demand.
- ICRA expects IMFL players to witness strong growth of ~15-20% in revenues in FY2023 led by a combination of volume and realisation-based growth.
- IMFL consumption is expected to improve substantially over the long term, supported by changing preference towards premium alcohols from the country liquor segment.

High ENA prices: retail price hikes to support IMFL players' margins

Exhibit: Trend in ENA price indexed to December 2019 levels

- Typically, Extra Neutral Alcohol (ENA) and glass account for more than 65% of the raw material cost for IMFL.
- ENA prices increased significantly in FY2020 owing to the ethanol blending policy announced by the Government in December 2018. As per the policy, the Government has fixed a target of 20% blending of fuel-grade ethanol with petrol by CY2025. This has altered the projected demand-supply dynamics for ENA with sizeable incremental demand from the petrochemical sector.
- After being subdued in FY2021 due to the impact of the pandemic, ENA prices started witnessing sharp rise from Q3 FY2022 onwards. ICRA notes that following the blending policy, new distilling capacities are being set up. However, the pace of new capacities getting commercialised and impact of the same on prices remains to be seen.
- While the ENA prices are expected to remain high over the near term, IMFL players are seeking price increases from the state governments to offset the impact to a certain extent. Some industry majors also restricted supplies to undertake price negotiations.

April-June remains peak season for beer sales

Exhibit: Quarterly revenue trend for beer companies

- Being a refrigerated drink, beer has its highest consumption during the summers, with peak volumes in Q1 (~30% of full year revenues) of every fiscal.
- Consequently, the first (Q1 FY2021) and second waves (Q1 FY2022) of Covid-19 adversely impacted the peak season sales for beer wherein the revenues declined significantly compared to Q1 FY2020 (pre-Covid period). ICRA sample set witnessed revenue growth of ~37% in FY2022 given the low base of FY2021 and gradual recovery in economy and mobility levels.
- The industry has shown strong revival in H1 FY2023 with ~16% higher revenues than the pre-Covid level (H1 FY2020). Early onset of a harsh summer has contributed to the same. ICRA expects beer companies to witness a strong YoY growth of ~30-35% in revenues in FY2023 supported by healthy performance in H1 FY2023.
- Industry revenues will remain healthy in FY2024 as well; however, YoY growth is likely to be lower due to high base of FY2023.
- Over the long term, the increasing popularity of low-alcohol beverages, launch of new variants of beer (with low and no alcohol content) and young demographics preferring beer for social gatherings is likely to support growth in volume of beer consumption.

Glass bottles and barley form 62-70% of beer manufacturing cost

Exhibit: Typical cost composition of beer

Source: Bloomberg, ICRA Research

Rising raw material costs continue to impact margins of beer manufacturers

Exhibit: Trend in barely prices (Rs. /Quintal)

Exhibit: Trend in soda ash prices (Rs./ Quintal)

- Barley prices witnessed a sharp rise of ~50% in April 2022 compared to March 2022 due to the Ukraine-Russia conflict and healthy demand during the peak season for beer, Q1 FY2023. Ukraine is one of the key producers of barley and caters to ~50% of India's requirement. The prices of barley remained firm in CY2022 due to healthy demand.
- Glass containers and flat glass industry consume ~40% of the soda ash, followed by chemicals at ~28% and detergents at ~17%. Healthy demand from these end-user industries has been driving soda ash prices up. The soda ash prices softened to some extent from August 2022 onwards; although, they continue to remain at elevated level compared to previous normal.
- With barley and soda ash constituting 62-67% of the cost of beer manufacturing, companies have faced ~50% and ~25% increase in these inputs in Q3 FY2022 to Q1 FY2023 respectively. These input cost trends have largely remained firm since then and have witnessed some decline in December 2022.
- Many beer manufacturers have increased selling prices by ~5-15% from April 2022, which has partially compensated the rise in input costs. The increase in selling prices has been supported by healthy demand for beer in the summer of CY2022. The ability of companies to get price increase from the state governments in a timely manner remains critical from profitability perspective.

Healthy revenue growth expected in FY2023

Exhibit: Trend in operating revenues for ICRA sample set

- Despite healthy YoY growth of 11.8% in revenues in 9M FY2020, Covid-19 impact during Q4 FY2020 led to a relatively moderate revenue growth of 3.0% in FY2020. While the industry was severely impacted in FY2021, revival in demand, increasing premiumisation and low base of FY2021 had led to a strong growth of 24.6% in FY2022.
- Industry revenues are likely to grow at ~18-20% in FY2023 and ~5-10% in FY2024, led by healthy volume growth in addition to improving contribution of prestige and premium brands to the overall revenues. In FY2023, majority portion of the popular segment brands (which contributed ~Rs. 1,350 crore revenues with operating profit margin (OPM) of ~14.5%) for one of the key alcohol manufacturers was divested. Despite the same, the sample set revenues are expected to grow at a healthy rate given robust demand across categories.

Marginal contraction in OPM in FY2023; margins expected to remain healthy

Exhibit: Trend in OPBITDA for ICRA sample set

- OPM for ICRA's sample set in FY2021 declined by 180 bps due to the impact of the pandemic on sales, partly compensated by cost efficiency measures undertaken. The price hikes offered by the Government, benign input costs in H1 FY2022 and continued benefits of cost optimisation measures supported margin expansion in FY2022.
- While elevated cost of ENA (for manufacturing spirits), barley (for manufacturing beer) and glass impacted the cost structure of alcobev manufacturers, price hikes and increasing demand for premium products (which are margin-accretive) are expected to cushion the impact to some extent.
- Nonetheless, the OPM for ICRA's sample set in FY2023 is expected to contract marginally to 13-14% from 14.4% in FY2022. ICRA's sample set is likely to report stable OPM in FY2024 led by expectation of healthy demand, steadily improving product-mix, and gradually easing cost pressures.

Capacity addition to continue aided by strong demand

Exhibit: Trend in capex outflow for ICRA sample set (Rs. crore)

- During FY2019, ICRA's sample set incurred capital expenditure (capex) of ~Rs. 1,023 crore primarily towards brewery capacity additions led by a key player in the beer market, enhancement of manufacturing infrastructure and maintenance capex.
- During the pandemic-affected period of FY2020-FY2022, the capex was relatively lower and ranged between ~Rs. 500-750 crore per annum, largely towards capacity enhancements in addition to upgradation. The sample set undertook modest capex at ~2-5% of operating income till FY2022.
- While Covid-related uncertainties pushed organic capex to the backburner in the past two years, the same is expected to be ~7-9% of revenues in FY2023. Much of the expansion is towards greenfield facilities (grain-based distilleries) and enhancement in backward integration capabilities (such as captive ENA production) by some companies (expected to be partly debt-funded). Other companies in the ICRA sample set are also expected to incur upgradation capex over the near term to support their future supply requirements.

Credit metrics to remain healthy

Exhibit: Trend in Debt/EBIDTA (x) for ICRA sample set

Exhibit: Trend in OPBDIT/Interest cover (x) for ICRA sample set

- Substantial reduction in debt over the past few years by industry majors, backed by healthy cash accruals, supported gradual improvement in debt coverage metrics from FY2020 to FY2022.
- While interest coverage remained healthy over the past years till FY2021, it witnessed a stark improvement in FY2022 due to the significant debt reduction along with expansion in operating margins, which was aided by economies of scale and increasing realisation.
- Despite relatively higher capex in FY2023, which is being funded partly through debt, healthy cash accruals are expected to maintain stable debt levels. Coupled with healthy operating profits, this is expected to support the industry's debt coverage metrics.

Impact of Covid -19 on our business operations

In view of the nationwide lockdown announced by the Government of India to control the spread of COVID-19, the Company’s business operations were severely disrupted from March 24, 2020. From May 2020, we resumed our business activities in a phased manner in line with directives issued by the central and state governments. Our business operations were severely impacted in particular by the loss of peak season in FY 20-21, interruption of production, disruptions in the supply chain, loss on materials etc. Similarly, the second wave of Covid was also during the peak summer months of March 2021 to May 2021 which impacted us adversely. We continue to actively review costs and focus on working capital and effective inventory management. The impact of COVID-19 pandemic on the overall economic environment continues to be uncertain. We will continue to closely monitor the situation and any material changes to future economic conditions. For the COVID-19 risk that we envisage impacting our business, please see ‘Risk factor 15’ at page 22 of this Draft Letter of Offer.

We intend to continue to leverage on our in-depth market research to enable us to introduce a wider range of products under our existing brands based on consumer preferences and demand and to distinguish ourselves from our competitors. Our products taste and packaging are crafted to appeal to the younger generation. By providing innovative products, we believe that we will be able to become a preferred brand to our customers, thus giving us the opportunity to consolidate our position with our target market and increase our market-share. We further believe

that it will provide us with early-mover advantages and higher profit margins and will present us with opportunities to capture shifts in customer preferences.

Strengthening up our business through working more on the trade channels and increasing the width of distribution

We see a big opportunity to grow further and faster, provided we can aid the awareness and trial generation effort through campaigns, complemented by our effort in the channels for availability of required quantity and quality.

Our marketing and engagement plan addresses the key important drivers that would help us reach our consumers in a more effective manner. The investment here would be in improving in channel awareness, visibility, cold stock availability through our own coolers in trade, cold rooms in walk-in-channel, trade engagement and consumer engagement programs.

Focus on operational efficiencies to improve returns

Offering quality products at attractive prices is a key aspect of maintaining and expanding our relationships with our customers. To that end, we have adopted a number of initiatives designed to improve our cost efficiency and as a one of our primary business strategies we intend to continue improving cost efficiency. We are addressing the increase in operational output through continuous process improvements, quality check and technology development. We intend to use a variety of other manufacturing strategies, sourcing strategies and cost reduction strategies to continue to improve our operational efficiencies. For example, we plan to: (i) install machines with higher productivity; (ii) implement low-cost automation; (iii) rationalize our manpower requirements; (iv) use our research and design capabilities to reduce process and component and packaging costs; (v) continually review our vendor base so that we secure the best costs amongst vendors that meet our quality requirements; and (vi) outsource non-critical operations so that we can focus our efforts on delivering the best quality products within our core areas. Our employees are regularly motivated to increase efficiency with error free exercise. We believe that this can be done through continuous process improvements, learnings, training and skill development.

Widening our customer base by entering into new geographies

We aim to pursue growth strategies to expand our market share across key geographies. On the domestic front as well, top 5 states contributed 95%, 86% and 84% of our domestic revenues for nine months period ended December 31, 2022, Fiscal 2022 and Fiscal 2021, respectively, which we intend to spread to more states to improve our reach, revenues and profitability. We intend to cater to the increasing demand of our existing customers by widening our market reach to areas in which we do not operate currently. Our emphasis is on expanding the scale of our operations as well as growing our network, which we believe will provide opportunities to grow our client base increase our market share, revenues and profitability. The domestic market offers various opportunities in term of sub-geographic penetration and market diversification which we intend to seize and increase our market share by exploring untapped markets. We shall also continue to explore opportunities in different regions to enhance our geographical reach.

Selectively Pursue Strategic Acquisitions in the medium term

We plan to selectively pursue acquisitions. In July 2018, we acquired a brewery plant in Odisha which generated 8.90%, 12.39% and 14.32% of total consolidated net revenues for the nine months ended December 31, 2022, Fiscal 2022 and Fiscal 2021, respectively. We intend to continue our strategic expansion plans through inorganic growth opportunities that allow us to expand our existing operations. Through strategic acquisitions, we intend to increase our scale of operations, access new clients and enter high growth geographies in a cost – effective manner.

We shall continue to evaluate potential opportunities that would allow us to expand our reach and strengthen our position.

Technology and Process

The technology for manufacturing Beer and Indian Made Foreign Liquor is well established. Our company and its promoter have the requisite knowledge and technology to produce the same, having been in this business since 1993.

Manufacturing Process

Beer making is a batch process which involves the extraction and scarification of starches and their conversion into an alcoholic brew by fermentation process. The basic ingredients involved in beer manufacturing are Malt, Adjuncts such as maize flakes or rice flakes, sugar, hops either in form of pellets or extracts, yeast and potable water. The basic functions involved are as follows:

- Malt Screening and Cleaning
- Malt Milling
- Mashing & Loitering
- Boiling of Wort with Hops
- Wort Cooling
- Fermentation
- Laagering and Balancing of Beer
- Filtration, Carbonation and Bottling

Step 1: Malt Screening and Cleaning

Malt grains are fed through the hopper of an elevator to a screening system consisting of sieves of two different perforations where the dust and small grains of malt are separated and conveyed through ducting to an aspirator. From the screener, the correct sized malt grains are passed on to a magnetic separator, while the dust and fine particles are led by a fan to the cyclone separator. Dust and chaff (loose grain skins) are sucked on to the shell side by centrifugal force and skimmed by a brush continuously. Grains so cleaned are passed over to a permanent magnet to remove ferrous particles, if any, preventing any damage to the rollers in the mill. The malt then passes to a de-stoner which operates on the principle of fluidization and difference in density. The cleaned malt is then fed to the malt mill through an elevator.

Step 2: Malt Milling

To achieve the best results, the milling of the malt grains should be such that the husks are least broken. Preserving husk integrity thus makes the bed of spent grains in the lauter tun, light and porous. Lauter Tun is a vessel for separating the wort from the solids of the mash. It results in rapid filtration of even highly viscous worts through the filtering spent grains bed, and thus increasing productivity. It also results in effective leaching (dissolving of soluble parts) of the grains bed during sparging. On the other hand, the grains (kernels) are reduced to a fine grit so that the conversion of starches into glucose is as complete during the mashing process. To fulfill these requirements a proven, simple and indigenous mill is incorporated. The gap between the crusher roller and the pressure on them are set as to achieve the best results. The malt after the milling is called grist.

Step 3: Mashing & Loitering

Grist from the mill is passed on to the mash kettle through a pre-masher. During mashing, the malt grist and water are mixed together. It is the first and most important step in beer production. Mashing decisively determines the composition of the mash, filtered wort and finally the quality of finished beer. During mashing, the contents of the malt grist goes into solution or are brought into solution by the activity of enzymes, while the insoluble substances are separated as spent grains in the lauter tun. The part, which is brought into solution, is called the extract. The extract concentration in cold wort which is fermented is called the original gravity. “Mashing-in-liquor” refers to the volume of water mixed with the malt quantity for a brew. Sparging refers to the water used in the lauter tun for leaching the remaining extracts from the spent grains. In Mashing the extraction of soluble and digestible insoluble substances from malt is extracted. The mashing process consists of three distinct stages, which are achieved at different temperatures. The first stage consists of separation of proteins from the malt. The second stage consists of conversion of starch into fermenting sugars and the third stage consists of the complete conversion of the remaining starch into maltose. The mash is heated up in stages as to a predetermined regime of time and duration. Mashing in occurs at specified temperatures and ultimately the temperature is raised to 760°C. At specific temperatures there are rest periods of 5 to 75 minutes. This enables the enzymes in the mash to break down the mash substances at their specific optimal temperatures. The mash, which contains all the water extractable matter, is transferred to the lauter tun along with the spent grains. Here it runs through the spent grains bed and false bottom of the lauter tun. During the mash transfer to the lauter tun, turbid worts are recirculated, so that by the end of the mash intake, clear wort collection starts. The bottom entry valves (mash infeed) guarantee a uniform intake.

Step 4: Boiling of Wort with Hops

The prime objectives of wort boiling are:

1. Extraction and transformation of hop components, which in turn influence, the other objectives favorably. Hops contain two types of aromatic materials. The essential oils which are volatile and the bitter resins. Essential oils give the aroma to beer. The bitter resins impart bitter taste and flavour.
2. Formation and precipitation of protein – polyphenol complexes.
3. Boiling of the wort with hop stabilises its composition.
4. During boiling, the wort is sterilised and all the enzymes activity is terminated.
5. Increase wort acidity and colour.

Boiling of wort is carried out by using low-pressure dry saturated steam in a tube type internal reboiler installed inside the kettle. The reboiler works on the principle of natural circulation loops also known as thermosyphon. The boiling time is for 90 minutes at atmospheric pressure and an evaporation of 8% per hour is ensured. After boiling, the wort is pumped into turbulence tun called a whirlpool in a direction tangential to the circular sheet of the tun. The function of the whirlpool is to separate the hot worts from the hot trub, which is extracted as clear wort. This gives a whirlpool motion to the liquid, and suspended matter is collected in the centre after the motion ceases from where it is removed.

Step 5: Wort Cooling

The hot wort is cooled before it is pitched with yeast for fermentation. This cooling results in the formation and precipitation of the cold break which is basically the remaining part of the proteins coagulated during boiling and removed in the whirlpool. This appears as a fine colloidal suspension of the beer. Wort aeration is carried out immediately after cooling by injecting sterile air into it. This assists in good coagulation of proteinaceous matter and also the dissolved oxygen in the wort enhances the development of the yeast during fermentation.

Step 6: Fermentation

Fermentation of sugars is an exothermic process. It is carried out under controlled conditions of temperature and pressure. During fermentation the temperature of beer is maintained at 150 °C by using a flowing cooling medium.

Step 7: Lagering and Balancing of Beer

The stage in the manufacture of a lager beer when it is stored at a low temperature for maturing and clarification. Lagering or conditioning of the beer is necessary to achieve the following effects:

1. Setting of yeast and turbid matter.
2. Saturation of beer with carbon dioxide.
3. Improvement in flavour as a result of maturation.
4. Precipitation of chill haze

After fermentation beer is cooled down from 150 °C to (-) 10 °C by using cooling medium. Chilled green beer is kept under pressure with CO₂. During conditioning, blending of beer is also carried out by mixing beer from different batches and of different gravity. At the end of the maturation process, the beer becomes clear.

Step 8: Filtration, Carbonation and Bottling

The clear beer is taken from conditioning tanks and passed through a modern filtration plant. The filtration plant consists of candle filter, i.e., coarse common filter aid (also known as kieselguhr filtration), which is followed by trap filter. The trap filter increases the clarity of beer. The beer after filtration and carbonation is pumped into bright beer tanks from where it is pumped through insulated pipes to the automatic bottle filling machine. Beer bottles are pasteurized and labelled by automatic machine and are finally packed for distribution.

Raw Materials, Utilities and Infrastructure Facilities

Raw materials

The primary raw materials essential to manufacture our product are barley malt, rice flakes, sugar, hops and other chemicals, which are available from various vendors/suppliers. Raw materials are procured and stored based on production planning, inventory and dispatch schedules for optimum working capital utilisation. We purchase our raw materials from multiple suppliers on a purchase order basis. We do not have long term contracts for the supply of our raw materials and we procure required raw materials through purchase orders. We have long established relationships with a number of such suppliers, and such long established relationship ensure stable supply without dependency on a single source. On receipt of the raw materials from the suppliers, our quality control team tests the materials and only after such testing of the materials, the quality control department confirms whether the material is to be approved or rejected.

Water

Our manufacturing facilities are located at places where ground water is abundantly available and we utilise the same with requisite permissions/connections from local municipalities to meet water requirements for our manufacturing process. Generally, we use ground water and municipal water tap connections provided by the authorities.

Power

Our power requirements are met through state electricity boards. Our manufacturing processes require uninterrupted supply of power in order to ensure that we are able to manufacture our products in time. To meet power failure exigencies, we have also installed diesel generators at our manufacturing facilities to ensure uninterrupted supply.

Plant and Machinery

Our manufacturing facilities have been built keeping in mind efficiency, safety and environmental factors. Our units have all the key ingredients for a successful manufacturing unit. We have made all endeavours in procuring the best equipment within the financial resources available that can effectively cater to customer needs. The major equipment and machinery installed at our manufacturing facility includes:

Sr. No	Plant / Machinery	Use / Process	Make / Manufacturer	Location
1.	Bottling Line	For Bottling of Beer Bottles	Krones, Germany	Bhopal
2.	Process Plant	For Manufacturing of Beer	Alfa Laval / Praj	Bhopal
3.	Process Plant	For Manufacturing of CO ₂ recovery	Pent Air	Bhopal

Subsisting collaborations, any performance guarantee or assistance in marketing by the collaborators, infrastructure facilities for raw materials and utilities like water, electricity, etc.

Our Company does not have any collaborations or any marketing assistance from any collaborators.

Sales

The efficiency of the marketing and network is critical to success of our Company. We maintain a strong sales force which reach out to the retailers and the distributors across all the major states where we are present. Our distribution network has a strong presence in certain semi urban and rural markets in India.

We mainly operate in government markets where the wholesaler is the government, and the retail trade/outlets is controlled by the private parties. Examples of such states are Madhya Pradesh, Odisha, Karnataka and Kerala. Thus, our debtors are mainly the government corporations.

We have a warehouse in Uttar Pradesh to stock our products. From this location, our products are typically sent directly to retail outlets after the payment of the requisite excise duty.

Marketing

Recognizing that the alcobev industry in India is brand centric, marketing our brands is one of our key focus areas. The primary aim of our marketing campaigns is to build brand awareness and achieve recall for our brands, especially in semi urban and rural markets. For nine months ended December 31, 2022, Fiscal 2022 and Fiscal 2021, our marketing expenditure was ₹ 3,486.64 lakhs, ₹ 3,521.77 lakhs and ₹ 4,575.24 lakhs, respectively. We work closely with the retail outlets and believe in working with the trade in the promotion and trials of our products.

Collaborations

As on the date of this Draft Letter of Offer, we have not entered into any technical or other collaboration arrangements.

Human Resources

We believe our employees are one of our most important assets and critical to maintaining our competitive position in our key geographical markets and in our industry. As on December 31, 2022 we had 170 full time employees.

The following table sets forth a bifurcation of the number of our employees as of December 31, 2022:

Sr. No.	Description	No. of Employees
1	Promoter Management	1
2	Top Management	2
3	Corporate support staff (Accounts, Secretarial, office staff)	15
4	Business staff	52
5	Others	100
Total		170

Competition

Alcobeve Industry in India is highly competitive. In particular, the beer segment consists of well entrenched brands which have built their brand equity over several decades. Many of our competitors, specifically the multi-national brands, have significant competitive advantages, including longer operating histories, larger and broader customer bases, more established relationships, greater brand recognition and greater financial strength, research and development, marketing, distribution and other resources than we do. The number of our direct competitors and the intensity of competition may increase as we expand our product portfolio and presence. They may also have the ability to spend more aggressively on marketing and distribution initiatives and may have more flexibility to respond to changing business and economic conditions than we do. Our competitors may also be able to respond more quickly and effectively than we can to new or changing opportunities, standards or consumer preferences, which could result in a decline in our revenues and market share.

Corporate Social Responsibility

We as a responsible corporate citizen are committed to take up different developmental projects, as part of our Corporate Social Responsibility (“CSR”) initiatives towards improving the quality of lives of the underprivileged sections of the society and other stakeholders. Our CSR strategies are aligned to national priorities to meet the basic needs of the local community. Our CSR policy defines the framework for implementing CSR activities in compliance with Section 135 of the Companies Act, 2013 and rules framed thereunder. The CSR committee has been constituted as per the applicable act. We demonstrate our commitment towards our communities by committing our resources and energies to social development and we have aligned our CSR programs with legal requirements under the applicable Indian laws. For nine months ended December 31, 2022, Fiscal 2022 and Fiscal 2021, we have spent an amount of ₹ Nil, ₹ 23.50 lakhs and ₹ 69.50 lakhs, respectively, towards our CSR initiatives.

Review Report to

The Board of Directors

Som Distilleries & Breweries Limited,

1. We have reviewed the accompanying statement of unaudited consolidated financial results of **SOM DISTILLERIES & BREWERIES LIMITED** (the "Holding Company") and its subsidiaries (the holding company and its subsidiaries together referred to as "the group") for the quarter ended **31st December, 2022** (the "Statement") attached herewith, being submitted by the Company pursuant to the requirements of regulation 33 of the SEBI (the Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (the "Listing Regulations").
2. The Holding company's management is responsible for the preparation of the statement in accordance with therecognition and measurement principles laid down in Indian Accounting Standard 34, ("Ind AS 34") "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India and in compliance with regulation 33 of the listing regulations. The statement has been approved by the holding company's board of directors. Our responsibility is to express a conclusion on the statement based on our review.
3. We conducted our review of the statement in accordance with Standard on Review Engagement ("SRE") 2410 "Review of Interim financial information performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountant of India ("ICAI"). This Standard requires that we plan and perform the review to obtain moderate assurance as to whether the statement is free of material misstatement. A review of interim financial information consists of making inquiries, primarily of person responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing as issued by the ICAI and consequently does not enable us to obtain assurance that would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the Circular No. CIR/CFD/CMD1/44/2019 dated March 29, 2019 issued by the Securities Exchange Board of India under Regulation 33(8) of the Listing Regulations, to the extent applicable.

4. The statement includes the results of the holding company and its following wholly owned subsidiaries:

(i) WOODPECKER DISTILLERIES & BREWERIES PRIVATE LIMITED

(ii) SOM DISTILLERIES AND BREWERIES ODISHA PRIVATE LIMITED

5. Based on our review conducted as stated in Paragraph 3 above, nothing has come to our attention that cause us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard ("Ind AS") specified under Section 133 of Companies Act, 2013, as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of listing regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

INDEPENDENT AUDITOR'S REPORT

To
Members of
Som Distilleries & Breweries Limited,
New Delhi

Report on the audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of **M/S SOM DISTILLERIES & BREWERIES LIMITED, NEW DELHI** (hereinafter referred to as the "Holding Company") and its subsidiaries "**WOODPECKER DISTILLERIES & BREWERIES PRIVATE LIMITED**" and "**SOM DISTILLERIES & BREWERIES ODISHA PRIVATE LIMITED**" (Holding Company and its subsidiaries together referred to as "the Group"), which comprises the consolidated balance sheet as at 31st March 2022, the consolidated statement of Profit and Loss (including other comprehensive), the consolidated cash flow statement and consolidated statement of changes in equity for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the Consolidated Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Group as at March 31, 2022, its consolidated **LOSS** including other comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) as specified under section 143(10) of the Companies Act, 2013 as amended ("the Act"). Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our report. We are independent of the group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to the following Notes to the accompanying consolidated financial statements:

- Note 37 regarding management's assessment of the impact of COVID-19 pandemic of the Group's operations for the period ending on 31st March, 2022.
- Note No. 49 regarding non availability of the necessary information of outstanding dues to Micro Enterprises and Small Enterprises.

Our opinion is not modified in respect of these matters.

Key audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the financial year ended March 31, 2022. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matters described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report, including in relation to these matters.

Key audit matters	How our audit addressed the key audit matter
Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the group expects to be entitled in exchange for those goods or services. Revenue is recognized to the extent it is probable that the economic benefits will flow to the group and the revenue can be reliably measured, regardless of when the payment is being received. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the Government. Based on the Educational Material on Ind AS 115 issued by the Institute of Chartered Accountants of India ("ICAI"), the recovery of excise duty flows to the Group on its own account and hence is a liability of the manufacturer which forms part of the cost of production, irrespective of whether the goods are sold or not. Since the recovery of excise duty flows to the group on its own account, revenue includes excise duty. However, sales tax/value added tax (VAT), goods and services tax are not received by the group on its own account and are taxes collected on value added to the commodity by the seller on behalf of the government. Accordingly, these are excluded from revenue.	Our procedures included the following: - Assessed the Group's revenue recognition accounting policy for sale of products. - Understood, evaluated and tested on sample basis the design and operating effectiveness of key internal controls over recognition and measurement of revenue. - Performed test of details on a sample basis and inspected the underlying accounting documents relating to sales accrual. - Tested on a sample basis, sales transactions near year end date. - Performed analytical procedures on revenue. - Assessed the disclosures in the consolidated financial statements in respect of revenue for compliance with disclosure requirements.

Other information

The Holding company's management and Board of Directors is responsible for preparation of the other information. The other information comprises the information included in the Holding Company's Annual Report, but does not include the financial statements and our auditor's report thereon. The Holding Company's annual report is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management and Those Charged with governance for the Consolidated Financial Statements

The Holding company's management and Board of Directors is responsible for the matters stated in sub section (5) of Section 134 of the Companies Act, 2013 ("the Act") with respect to the preparation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated changes in equity of the group in accordance with the Accounting Principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the Group entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group are responsible for overseeing the financial reporting process of the Group companies.

Auditor's Responsibility for audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve

collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on the internal financial controls with reference to the consolidated financial statements and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities and business activities within the Group entities to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the holding company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the financial year ended March 31, 2022 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss related to adverse changes in market prices, including interest rates. In the normal course of business, we are exposed to certain market risks including interest risk.

Interest rate risk

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates as well as fixed rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Liquidity risk

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. Our Company's objective is to all time maintain optimum levels of liquidity to meet its cash and collateral requirements. We employee prudent liquidity risk management practices which inter-alia means maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities.

Credit Risk

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables.

We consider our customers to be creditworthy counterparties as our major supplies are to state government beverage corporations which limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.
